

## Hydraulic Pump for Dental Unit Chair

# DMP-50-250

- Stable integral structure of pump body and Gear Guide
- Constant and strong hydraulic pressure
- Low noise and low vibration
- Size & Weight :  $\Phi 128 \times 128\text{mm}$ , 5kg

Pressure	7MPa (70 bar)
Discharg	0.8 / 0.9 LPM
Rating Time	1 min
Voltage	220V, 50/60 Hz
Motor Output	0.2 kw
Current	2.0/1.7 A
Capacitor	50 $\mu\text{F}$ , 250 VAC

Exporting over 50 countries...

# DMEGA Hydraulic Motor Pump

DMEGA hydraulic motor pump which is in a crescent integral seal type minimized flow losses and get rid of crescent seal failure rates by break off with precise structure and stable hydraulic pressure.

Precision gear grinding prevented secondary flow loss and establishment of test system enabled customers to use stabilized quality product.
